Data Center Build Project Charter

A project charter document helps to establish clear and defined project scope by outlining important aspects of the data center build project. This is also useful in identifying potential risks that could hinder project performance.

This handy tool from [Info~Tech Research Group](#) has been pre-populated with a real-life example of what a data center build project charter might look like ô you can change, delete or add to the example as required. Use this project charter template to define the project description, key success factors, risk identification and much more.

Included in this zip file are:

- Data Center Build Project Charter.doc
- Intro Doc.pdf
- Terms and Conditions.pdf
