## **Data Center Site Selection Checklist**

After the organization has evaluated potential site locations and determined a short list, an extra step in due diligence should be performed. Site visits can help to validate decisions, and identify any potential issues in chosen locations.

Use this checklist from [Info~Tech Research Group](#) to help you understand what to look for before and during a site visit to ensure due diligence has been covered, as well as to aid with the final selection decision for a data center building site.
