## Database Encryption Readiness Assessment

Data and communications encryption are often the responsibility of data center managers. Legislative compliance and growing demands from consumer privacy are forcing enterprises in all industries to encrypt their data. This Excel tool assesses the enterprise's need and state of readiness for data encryption by:

- Conducting an extensive questionnaire.
- Calculating the tipping points for requirements and readiness.

Do not allow the enterprise to suffer the financially devastating effects of a data breach. Determine if data encryption is a fit for the company's critical information.
