## **Intranet Planning Project**

An Intranet is essentially a private communications network. It utilizes the same technologies that make the Internet a useful tool across multiple computer platforms and around the world. These technologies allow for rapid development and deployment of data and applications throughout an organization.

This Intranet Planning Project Template covers these basic areas:

- Review Process with stakeholder and employee groups.
- Types of content (including e-mail and other communications) to be managed via the Intranet.
- Infrastructure required to support the Intranet.

Use this template from [gantthead.com](http://gantthead.com) to guide your Intranet project planning.

Included in this ZIP file are:

- Intrannet-Planning-Project.doc
- Intro Doc.pdf
- Terms and Conditions.pdf
